The Best voice and Vocal variety speaker - Crystal toastmasters Club: Youth leadership program speech contest, Malaysia 2016

ABOUT ME

I'm a Swedish/Malaysian Game Programming student at Howest, Belgium, seeking an internship as a Technical Designer or Gameplay Programmer.

I have a strong interest in building fun and engaging experiences for players. I've developed teamwork, communication and leadership skills through group projects and previous work experience. I am confident working with C++, C#, Unity, Unreal Engine and custom engines.

I'm open to learning new languages, frameworks, and tools. In my spare time, I enjoy oil painting, clay sculpting, volleyball, and badminton.
