The Best voice and Vocal variety speaker - Crystal toastmasters Club: Youth leadership program speech contest, Malaysia 2016

ABOUT ME

I'm a Swedish/Malaysian Digital Arts and Entertainment student specialising in Game Development at Howest, Belgium, seeking an internship in Gameplay Programming and Game Design. I enjoy making and designing games, with a strong interest in building fun and engaging experiences for players.

Through long-term, short-term group projects and previous work experience, I've developed teamwork, communication and leadership skills. I am comfortable working with C++, C#, Unity, Unreal Engine, custom engines and version control tools such as Git and Perforce.

I'm open to learning new languages, frameworks, and tools. I enjoy taking on creative challenges and in my spare time, I enjoy oil painting, clay sculpting, volleyball, and badminton.
